

AXIUM D7

The Smart, Easy & Efficient ECR Solution

- Feature-rich and modular Android platform and TETRA payments solution
- Built on a powerful next-generation platform to converge payment and business
- Sleek, light-weight, innovative design provides exceptional mobile and countertop use
- Android platform for easier development and access to feature-rich apps
- Designed to take advantage of the Telium TETRA ecosystem, including tools, security, application and estate management

The Axiom D7 is a scalable and modular tablet-based business and payment solution that helps merchants build smarter businesses and create personalized in-store experiences.

Flexible Configuration Options

The best connectivity and accessory options in the market. Axiom D7 includes 4G, WiFi communications for mobile use and physical connectivity to networks when docked on the optional countertop stand. The Axiom stand accessory provides an integrated receipt printer and USB-A ports for connecting peripheral hardware like a cash drawer, scale, or barcode reader.

Cloud Services Capabilities

Designed to work with a broad array of Ingenico support services for acquirers and merchants. Acquirers can connect to the Axiom D7 for estate management and other functions. The Axiom D7 can connect merchants to the Ingenico Cloud Services Center for POS as well as business and analytics services.

PCI-Compliant & Open Android Environment

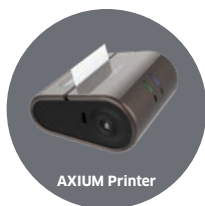

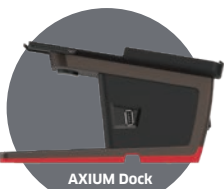

The Axiom D7 empowers merchants with a PCI-compliant and Android platform for flexible development and convenient access to applications.

Flexible & Comprehensive Payment Acceptance

The Axiom D7 accepts all payment methods, including magstripe, EMV, NFC/contactless, alternatives such as QR codes and cross-channel capabilities.

Sleek & Modular Design

With a large 7" tablet display and thin, lightweight design, the Axiom D7 offers an ideal user interface as well as customer facing physical keypad and display. The optional accessories also support a wide range of use cases.

Processor	Application & crypto processor	ARM Cortex-A7 Quad Core & Secure Cortex A5	●
